OBJECTIVE

Software Engineer with **5 years** of experience in **React.js**, seeking full-time **Front-End/Full-Stack Developer** roles.

SKILLS

Front-End Skills JavaScript, TypeScript, React.js, Next.js, Three.js, Redux, Tailwind, MUI, Vite

Back-End Skills Node.js, Express.js, MongoDB, Firebase, Supabase, Prisma, RESTful APIs

Other Skills Git, CI/CD, Azure DevOps, Figma, Adobe XD

EXPERIENCE

Software Engineer
Arkellis

Jun 2023 - Present
Ernakulam

- **Led the development** of the company's flagship product from **concept to launch**.
- Pioneered integration of **3D web development** and **utilized WebXR** for innovative solutions.
- **Actively contributed insights** and ideas during product ideation meetings.

Software Developer
Outlogics

Apr 2022 - Jun 2023
Trivandrum

- **Engaged with clients** to understand requirements, gather feedback, and ensure satisfaction.
- Ensured smooth operation and reliability by **proactive product maintenance**.
- **Mentored interns**, imparting practical web development skills and knowledge.

Associate Software Developer
TechByHeart

Jan 2017 - Jan 2019
Ernakulam

- Utilized React.js and related technologies to develop and maintain web applications.
- **Worked with cross-functional teams** to deliver high-quality products.
- **Led the development** of a project from inception to launch.

PROJECTS

Ausrine: A SaaS platform leveraging **Digital Twin** technology for engineering and manufacturing, enabling 3D visualization, **AR/VR product demos**, and applications in **equipment training, maintenance, inspection**, and virtual walkthroughs to optimize pre-sales and marketing workflows.

- Built a **multi-tenant, centralized admin dashboard** for asset and data management.
- Created a client-facing 3D web interface supporting interactive model viewing with **AR/VR integration**.
- Engineered a **3D Model Authoring System** with editing, slicing, animation, and **step-by-step navigation features**, including real-time previews.
- Optimized app performance, minimized bundle size for faster load times and improved UX.

(React.js, Three.js, Babylon.js, MSAL, TanStack Query, Zustand, Razorpay, DevExtreme)

Digital Experience Center: An immersive platform for asset administration, combining **real-time IoT data**, Data visualization, **3D-AR previews**, and Media.

- Developed an **immersive asset administration** platform with real-time IoT data, 3D-AR previews, and media integration.
- Featured a **Presenter display and multiple Viewer displays** connected to the Presenter.
- Enabled presenters to **interactively control and showcase asset** data and media.

(React.js, Nats.ws, Google Model Viewer, Keycloak.js, Recharts, DevExtreme)

Sipo Cloud POS: A cloud-based Point of Sale (POS) system designed specifically for retail and businesses, featuring **online ordering and table ordering** capabilities for restaurants.

- Online Ordering: Robust system with **product variations, add-ons**, and POS integration.
- Tableside Ordering: **Contactless system** for browsing, ordering, and payment.
- Maintenance, Features: Ensured stability with **bug fixes**, added **combo** functionality, **coupon** integration, **add-ons** management, and **theming** options.

(React.js, Redux, Razorpay, Firebase, MUI)

InternCan: An **online internship training platform**, preparing students with job-oriented skills for corporate readiness. Bridging industry knowledge gaps with rigorous learning experiences.

- **Developed dashboards** for admins, colleges, students, corporates, and soft skill companies.
- Implemented front-end validation for **bulk data uploads**, ensuring data integrity.
- Enhanced student engagement with **secure video access** and **post-video assessments**.

(React.js, Redux, Razorpay, AntD)

Moto 365: A one-stop **automotive care platform** for all vehicle types, offering services such as buying/selling vehicles, insurance, a marketplace, and a **blog** providing insights and updates on the automotive industry.

- Led the **redesign of Automoto's website** for a modern user experience.
- **Revamped the Moto 365 blog** for a more engaging and informative layout.
- Optimized the automobile **buying and selling feature** with intuitive interfaces.

(React.js, Next.js, Redux, Firebase, AntD)

GizShare: A social media platform for sharing studies, research, and courses, with user-generated content and course purchases.

- Revived the project from a difficult state, completing it in two months and delivering a successful client demo.
- Focused on front-end development and explored Django backend.
- Built features including nested comments, live chat with file uploads, emoji selectors, and multi-language support.

(HTML, CSS, JavaScript, JQuery, Bootstrap, Django)
